Ethan Jones

Milwaukee, WI | e.jones@marquette.edu | (712)-890-7394

Objective: Seeking an internship opportunity in business data analytics, cybersecurity, IT, software development, or machine learning to apply technical skills, gain practical experience, and contribute to impactful projects.

Education

Marquette University – Milwaukee, WI May 2027

Bachelor of Science, Computer Science GPA: 3.83/4.00

Minors in Cybersecurity, Information Systems, and Spanish Language, Literature and Culture

Relevant Coursework: Object-Oriented Software Design in Java (Fall 2023), Data Structures (Spring 2024), Hardware Systems (Fall 2024), Operating Systems (Spring 2025), Data Mining (Spring 2025), Database Management Systems (Fall 2025), Network Design and Security (Fall 2025)

Awards and Honors:

- Marquette Core Honors Program: Fall 2023 – Present
- Marquette College of Arts and Sciences Dean's List: Fall 2023, Spring 2024, Fall 2024, Spring 2025

Study Abroad: Madrid, Spain

Study abroad coursework in Art and History of Madrid; enhanced cross-cultural communication and adaptability by engaging with local culture and academic community May 2025 – June 2025

Experience and Skills

Operating Systems Spring, 2025

- Worked on a team project to build an embedded operating system on RISC hardware, implementing core modules for process control, scheduling, memory management, file systems, and security using *C* and *RISC-V assembly*

Data Mining Spring, 2025

- Performed exploratory data analysis on a panic disorder dataset using *Python (pandas, seaborn);* cleaned data and addressed class imbalance with *SMOTE*
- Trained and evaluated *Logistic Regression, Random Forest, and kNN* machine learning algorithms; measured performance with precision, recall, F1-score, ROC, and AUC

Database and Visualization Work

- Designed relational databases with *SQL* and built interactive dashboards in *Power BI* to communicate insights

Enterprise Security

- Used *Splunk* for enterprise monitoring, log analysis, and security administration
- Conducted packet-level analysis with *Wireshark* on UDP/TCP and HTTP protocols to detect possible security risks and perform log analysis
- Used *Ghidra* to reverse-engineer and analyze malicious programs

Additional Skills and Language

- Programming and development in *Java*
- Spanish—Proficient in reading, speaking, and writing

Activities and Involvement

Association of Computing Machinery (ACM)

Role: Outreach Coordinator Fall 2023-Present

- Responsibilities include running social media pages, promoting club events, and facilitating volunteer participation for the annual Wisconsin-Dairyland Programming Competition hosted by Marquette

Sigma Delta Pi Hispanic Honor Society Gamma Gamma Chapter

Role: Treasurer Spring 2025-Present

- Responsibilities include handling finances and records, collecting dues, and running fundraisers

FBI Focus Outreach Program Fall 2024-Spring 2025

- Explored topics in complex financial crimes, violent gangs and drug crime, human trafficking, cybercrime and counterintelligence; learned directly from FBI professionals through case studies and simulations
